

# Abbott Analytical

Consulting Scientists to the Disinfectant Industry

## Certificate of Analysis

**Sample(s) :** Eight swabs

**Received from:** Cleanitise Ltd. Unit 4 Block C, Kingsbridge Industrial Estate, Gorseinon, Swansea, SA4 4HJ

**Date received:** 9 April 2010      **Date tested:** 9 April 2010

**Certificate no:** 10D.037.CLE      **Certificate date:** 16 April 2010

**Sample ref:** 10D/030-037      **Page:** 1 of 1

**Analysis required:** Total Viable Count, Yeasts & Moulds

### Results:

	<b>TVC</b>	<b>Yeasts</b>	<b>Moulds</b>
Ambulance seat at side of stretcher Before	<10	<10	<10
Ambulance seat at side of stretcher After	<10	<10	<10
Wall Cabinet RHS of stretcher Before	4440	270	<10
Wall cabinet RHS of stretcher After	<10	<10	<10
Floor to rear of ambulance stretcher Before	340	40	<10
Floor to rear of ambulance stretcher After	<10	<10	<10
Stretcher front Before	410	240	20
Stretcher front After	<10	<10	<10

### Conclusion:

Although the swab samples before cleaning show little contamination, all of the post cleaning swabs show a total absence of bacterial contamination suggesting that **Cleanitise** is a good disinfecting agent when used under these conditions.
